

Partners for Native Landscaping: Workshop for Homeowners

Powder Valley Conservation Nature Center
February 23, 2013

Missouri Department of Conservation:

- ❖ To protect and manage the fish, forest, and wildlife resources of the state;
- ❖ To serve the public and facilitate their participation in resource management activities; and
- ❖ To provide opportunity for all citizens to use, enjoy, and learn about fish, forest, and wildlife resources.

*“Connecting people
to nature in their
everyday lives.”*

The Grow Native! program helps protect and restore our state's biodiversity by increasing conservation awareness of native plants and their effective use. By building partnerships among private industry, non-profit organizations, government agencies and landowners, Grow Native! aims to significantly increase the demand for and use of native plants on all landscapes.

Grow Native! provides individuals, organizations, schools and government agencies with information, education and training materials that help them discover and use native plants. Grow Native! also offers businesses marketing materials that help "grow" sales.

Metropolitan Sewer District

- MSD is a public agency and is the only special district in Missouri created under a provision of the State Constitution.
- MSD's responsibilities include the interception, collection and treatment of wastewater, as well as stormwater management. MSD's current boundaries cover 525 square miles and encompass all of St. Louis City and approximately 80 percent of St. Louis County.
- MSD treats an average of 370 million gallons of sewage per day.
- MSD operates and maintains 9,790 miles of sewers. The age of sewers maintained by MSD ranges in age from less than a year old to 150 years old.
